

# Targeting Speech Skills for a Child Who Is Deaf or Hard of Hearing

From Assessment to Intervention

FRIDAY, DECEMBER 9, 2011 at SIUE

This introductory level workshop is designed for SLPs who have limited experience evaluating, creating goals and planning speech therapy sessions for children who are deaf or hard of hearing.

A complete testing protocol will be discussed, along with an overview of assessment techniques. An audiologic overview will provide a basis for understanding the speech characteristics of children who are deaf and hard of hearing.

Specific therapy techniques will help participants design practical therapy sessions for children at a variety of ages, birth-12+ years.

### Workshop Hours

9:30 a.m. to 4:30 p.m.

### CID Faculty

Greta Bohnenkamp, MS, CCC-SLP

Katie Grzesik, MA, CCC-SLP

### Topics

- Audiologic overview, including cochlear implants vs. hearing aids, types of hearing loss and audiologic tests
- Speech and language characteristics associated with degree of hearing loss
- Evaluation: choosing the proper assessment tools
- The beginning listener: therapy ideas for developing articulation, phonology and suprasegmental skills
- The experienced listener: therapy ideas for continued development of articulation, phonology and suprasegmental skills

### Registration

Completed application form and payment are required for registration. We accept check, MC, VISA, Discover or purchase order. We recommend early registration.

### Where

**SIUE/Morris University Center**

Illinois-Mississippi Room

### Tuition

**\$150** includes one-day workshop, handouts, morning/afternoon beverage and light snack.

**APPROVED PROVIDER**
