SOUTHERN ILLINOIS UNIVERSITY
EDWARDSVILLE

SCHOOL OF ENGINEERING

High School Outreach 2011
Summer Residential Program

Session 1: June 6-10, 2011
Session 2: June 13-17, 2011

Program Details

The goal of the High School Outreach Summer Program is to introduce various engineering disciplines, computer science, and construction management to young, aspiring high school students through a set of activities that are fun, challenging, and thought-provoking. Students will have the opportunity to learn about how engineering impacts our lives through participation in various hands-on laboratory experiments, design contests, and field trips. They will also get a flavor of residential college life, and will hopefully build lasting friendships with their peers from other high schools.

Eligibility

Current freshmen, sophomore and junior high school students interested in science, technology and engineering are encouraged to apply.

Housing

Accommodations will be provided in the university residence halls. Participants will be assigned to double occupancy rooms with shared bathroom facilities.

Meals

Each participant will be issued a university debit card to use for meals and snacks at the Morris University Center.

Supervision

Students will be supervised during all academic and recreational activities, including the overnight residence hall stay.

Recreation

Participants will have access to the Vadalabene Center and University Center in the evenings for a wide range of individual and group activities.

Insurance

All participants will be provided with limited Camper's Medical Benefit Coverage during the program. Coverage will provide for necessary medical treatment of accidental injury up to the policy maximum.

Awards Reception

An awards reception will be held for all participants at the end of the week. Each student will receive a certificate of participation and a commemorative group photo. Family and friends are invited.

Program Cost

The fee for the High School Outreach Summer Program is \$350 and includes accommodations, food, transportation to and from field trips, as well as necessary materials and supplies. A limited number of scholarships are available for students who can demonstrate inability to pay for the full cost of the program.
